

Hello,

Welcome to my playground. This area is designed to organize a selection of online projects for reference.

I have to admit, I'm not comfortable using the word "conspectus" but the following's neither a résumé nor a portfolio although it looks like a résumé and acts like a portfolio. I'm beginning to think it's more of an excuse to use these backgrounds together.

If you find anything here that inspires you to involve me in your project then it has served its purpose. Please visit this online in order to browse the links and view additional information.

Cordially,

Robert H. Means

Enclosure: Conspectus

Website Solutions

Overview: *The following is a sample of Website projects that demonstrate creative organizational approaches and practical features and showcase a variety of solutions available by way of the ubiquitous Web browser.*

What's here

- PHP
- MySQL
- JQuery
- JavaScript
- CSS3/HTML5
- Joomla!
- WordPress

Most of the projects you will find here I designed in Photoshop and built using Dreamweaver. Lately I have delved into Joomla! and WordPress as they continue to grow in popularity. These CMS publishing platforms offer a variety of tools along with an intuitive UI and an editing environment that virtually anyone can manage. Even these CMS options can be enhanced by someone familiar with the programming that wires them together.

The video projects are edited using Premiere.

🕒 Notable projects include: [Forest Heights Lodge](#) | [Acts Church](#) | [Satilla, Inc.](#)

Project Pen

Web Developer

Outsource Contractor

- Development of Website concepts and design for small businesses
- Skilled with incorporating complex styles and features within custom design
